Master Setting Disks (Range for Diameter Relief Bands)

As of 1/4/2010, unless otherwise specified Vermont Gage will manufacture all Setting Disks per the Gage Blank standard ASME B47.1 – 2007. All Setting Disks diameters up to and including 1.510" (38.35mm) will have "Relief Bands" ground on both ends of the diameter. All setting Disks above 1.510" (38.35mm) will have a straight diameter across the entire measuring length. Any Setting Disks that require "Relief Bands" ground on gages over 1.510" (38.35mm) must be specified. There will be an additional cost for "Relief Bands" on gages above 1.510" (38.35mm).
